

Financial Assistance Program

At Blueprint Genetics, we strive to deliver the highest quality genetic testing in a way that is also financially accessible to patients and families.

Our billing team will collect the information needed to help your patient access testing in the most cost-effective way, given their insurance plan and annual income details.

How to participate?

Place an order through our online portal (nucleus.blueprintgenetics.com), or by completing a paper requisition form

Blueprint Genetics will perform a benefits investigation (BI) and contact the patient to discuss their insurance plan's coverage for the test ordered

Our billing team will ask about family size and household income to determine if the patient qualifies for a reduced out-of-pocket (OOP) cost

We will explain the patient's options for payment, and only move forward with testing when the patient is comfortable with their OOP cost

Key benefits:

- Our entire test menu is covered by the Financial Assistance Program. This includes all **single gene, panel tests, whole exome sequencing, familial variant, and targeted variant tests**
- Patients with any commercial insurance are eligible for this program, as are those who are uninsured or covered by Medicaid, Medicare, and TRICARE
- The program is based on income level and household size, with a tiered pricing structure **inclusive of families** making up to 600% of the federally established poverty level guidelines

Blueprint Genetics

Cost should not be a barrier to genetic testing

Income Eligibility Chart for the 48 Contiguous States, the District of Columbia, and US Territories

Family Size	200% (2 times) the Federal Poverty Guideline	400% (4 times) the Federal Poverty Guideline	600% (6 times) the Federal Poverty Guideline
1	\$27,180	\$54,360	\$81,540
2	\$36,620	\$73,240	\$109,860
3	\$46,060	\$92,120	\$138,180
4	\$55,500	\$111,000	\$166,500
5	\$64,940	\$129,880	\$194,820
6	\$74,380	\$148,760	\$223,140
7	\$83,820	\$167,640	\$251,460
8	\$93,260	\$186,520	\$279,780
Each additional member	\$9,440	\$18,880	\$28,320

The 2022 poverty guidelines are in effect as of January 12, 2022. These figures will be updated annually.

Financial Assistance Program: Test Prices

Test	Prices for families making up to 200% Federal Poverty Guideline	Prices for families making up to 400% Federal Poverty Guideline	Prices for families making up to 600% Federal Poverty Guideline
Familial and Targeted Variant testing	\$50	\$70	\$90
Single Genes	\$250	\$300	\$350
Panels	\$250	\$300	\$350
Whole exome sequencing- proband only	\$250	\$300	\$350
Whole exome sequencing- duo	\$400	\$450	\$500
Whole exome sequencing- trio	\$550	\$600	\$650
Whole exome sequencing- quad	\$700	\$750	\$800

*** Patient is responsible for paying the out-of-pocket (OOP) amount prior to the start of testing**
